# Lottie the Loggerhead Sea Turtle

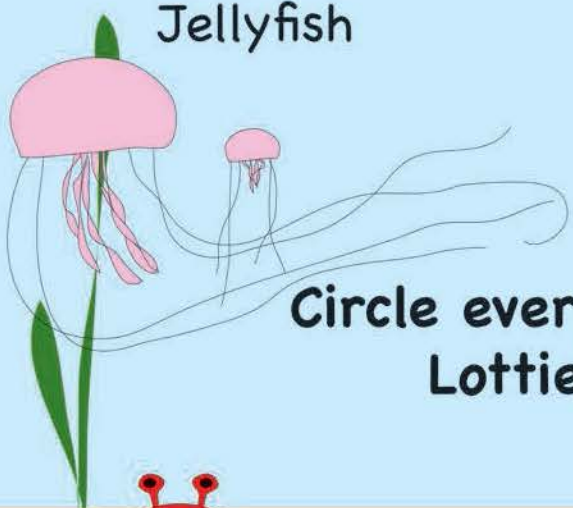

**Color Me!**  
The loggerhead's body is **tan**,  
and its shell is **reddish-brown**.

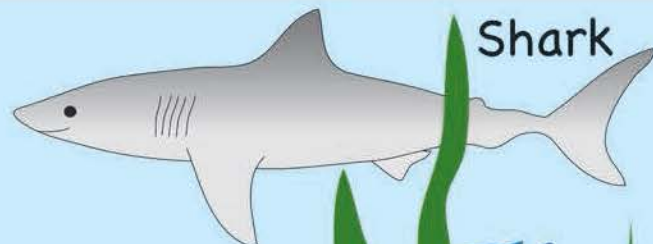

**Length**  
The shell of a loggerhead  
is about 3 feet long.  
How tall are you?

**Weight**  
An average loggerhead  
weighs 250 pounds.  
What else weighs that much?

**Jellyfish**

**Shark**

**Fishes**

**Crab**

**Starfish**

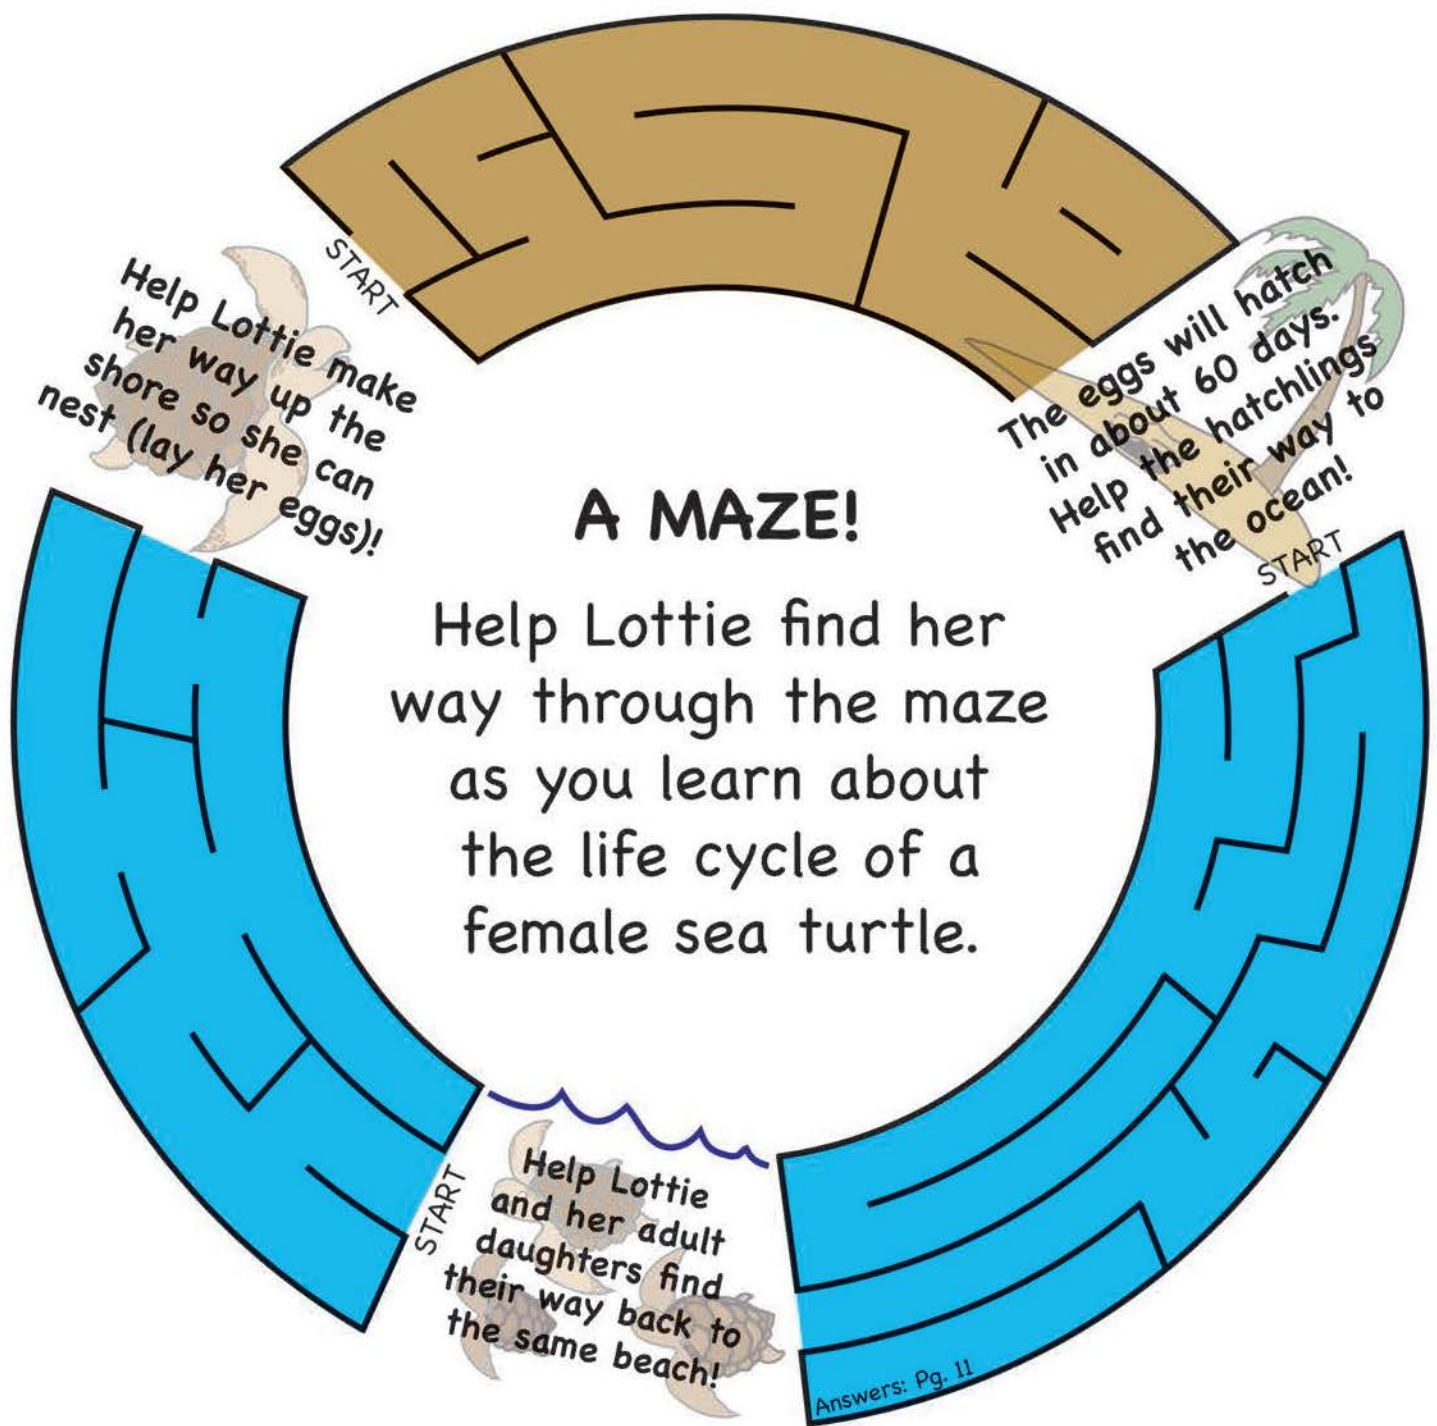

**Circle everything you think Lottie would eat.**

Answers: Pg. 11

The loggerhead's favorite food is jellyfish.  
What's yours? \_\_\_\_\_

START  
Help Lottie make her way up the shore so she can nest (lay her eggs)!

START  
The eggs will hatch in about 60 days. Help the hatchlings find their way to the ocean!

START  
Help Lottie and her adult daughters find their way back to the same beach!

Answers: Pg. 11

**A MAZE!**  
Help Lottie find her way through the maze as you learn about the life cycle of a female sea turtle.

**What Does the Future Hold?**  
Adult female sea turtles return to the same beach every few years to nest. As the seas rise, it will be harder and harder for them to return to certain places to nest since their favorite beaches will now be under water.
